Frontend engineer with 4+ years of professional experience building production web and mobile applications in JavaScript and TypeScript. I work day to day across React, Next.js and React Native — from component architecture and design systems through to shipping browser extensions and app-store releases. I care about accessible, responsive interfaces and about the internationalization, performance and tooling decisions that keep them maintainable.

HIGHLIGHTS

Frontend engineer at Skim (Credible AI Labs), responsible for frontend development across the web app, the Chrome extension and the mobile app published on the App Store and Google Play. Former partner and technical leader at inkPen, where I coordinated the development team. Ongoing contributor to PriceTrack, a marketplace analytics SaaS at Tracking Trade. Fluent in Portuguese and English.

PROFESSIONAL EXPERIENCE

Software Engineer and Technical Leader

inkPen

AUGUST 2023 - DECEMBER 2024

Joined inkPen as a volunteer building front-end web and mobile applications with React, React Native and Next.js. After a year I became a partner and took on technical leadership, coordinating the development team and taking a direct role in the product's creation and evolution. My focus was making sure what we delivered was efficient, well built and aligned with the company's goals.

Frontend Developer

O Personal Digital

JULY 2022 - APRIL 2024

Front-end developer on the company's flagship SaaS for personal trainers. Worked mainly in Angular and TypeScript to improve and build new features for the web application, collaborating closely with product, marketing, customer support and the wider technical team.

Software Engineer

Lisbom Dev

JULY 2022 - APRIL 2024

Freelance front-end developer delivering new projects and maintaining existing ones. Applied my front-end expertise to build new interfaces and to ship the updates and fixes those projects needed as they evolved.

Software Engineer

Truck Up

JANUARY 2023 - MARCH 2023

Maintained the front-end of the management platform behind Truck Up, the company's flagship product, covering its operational processes and data. Worked with JavaScript, TypeScript, React, Material UI and Git.

Frontend Developer

Tracking Trade

NOVEMBER 2023 - PRESENT · CONCURRENT ROLE

Front-end developer maintaining and extending the company's SaaS products, focused on JavaScript, React and Next.js. My main contribution is PriceTrack, a solution that gives companies data and metrics on the products they sell across online marketplaces.

Frontend Engineer

Skim (Credible AI Labs)

DECEMBER 2024 - PRESENT

Frontend engineer at Skim (Credible AI Labs), a free AI-powered platform that summarizes YouTube videos and news articles while scoring them for credibility and bias. I am responsible for frontend development across the main website (skim.plus), the Chrome extension, and the mobile app published on both the Apple App Store and Google Play. The platform is powered by Gemini and Claude, helping users quickly assess how trustworthy any piece of online content is.

EDUCATION

Federal Institute of Alagoas (IFAL), Maceió — High School with integrated Technical Diploma in Internet Computing

FEBRUARY 2018 - MARCH 2022

Where I qualified as an Internet Computing Technician, and where my passion for web development started.

Estácio, Maceió — Systems Analysis and Development (Associate Degree)

OCTOBER 2023 - IN PROGRESS

Deepening my computer-science fundamentals alongside full-time professional work.

TECHNOLOGIES

Languages: TypeScript, JavaScript, HTML, CSS · Frontend: React, Next.js, React Native, Expo, Angular, Redux and Redux Toolkit, ReactiveX, Gatsby, Storybook · Styling: Tailwind CSS, Sass, Styled Components, Material UI, Bootstrap · Backend and data: Node.js, Express, GraphQL, Apollo, Prisma, Firebase, MongoDB · Tooling: Git, Handlebars

COMPLEMENTARY COURSES

Udemy — Web Development with JavaScript and React

JULY 2021 - NOVEMBER 2021

Practical and theoretical grounding in JavaScript and React and the wider modern web toolchain — the foundation the rest

of my professional work was built on.

STRENGTHS

- Collaboration across product, design and engineering
- Technical leadership and team coordination
- Clear written and verbal communication in English and Portuguese
- Ownership and adaptability in fast-moving teams

LANGUAGES

Portuguese: Native

English: Advanced
